Mixed Practice Word Problems #9

1. There are 43 dogs, 72 fish, and 34 cats at my farm. How many pets do I have at my farm?
2. Dane eats lunch at 12:30. It takes him 20 minutes to eat. What time does Dane finish eating?
3. Kyle has four dimes, one nickel, and one quarter. Does he have enough to buy a book that costs \$1.00?
4. Charlie has 31 more snowballs than Lucy. She has 19 snowballs. How many does Charlie have?
5. Josh had \$1.80. He paid 45 cents for a candy car. How much change will he get?
6. I have 9 pennies, 4 nickels, and 3 dimes. How much money do I have?

Answers

1. $43 + 72 + 34 = 149$
I have 149 pets at my farm.
2. $12:30 + 0:20 = 12:50$
Dane finishes eating at 12:50.
3. $4 \text{ dimes } (4 \times 10) + 1 \text{ nickel } (5) + 1 \text{ quarter } (25) = 40 + 5 + 25 = 70 \text{ cents}$
He does not have enough (the book costs 100 cents, but he has 75).
4. $31 + 19 = 50$
Charlie has 50 snowballs.
5. $\$1.80 - \$0.45 = \$1.35$
He gets \$1.35 in change.
6. $9 \text{ pennies } (9 \times 1) + 4 \text{ nickels } (4 \times 5) + 3 \text{ dimes } (3 \times 10) = 9 + 20 + 30 = 59$
I have 59 cents.
