Mixed Practice Word Problems #6

1. If you have 2 quarters, 5 dimes, and 4 nickels, how much money do you have?
2. The puppet show begins at 2:00 p.m. It lasts 1 hour and 30 minutes. What time does it end?
3. John's birthday is January 20th. His sister's birthday comes 14 days later. When is his sister's birthday?
4. How many quarters equal \$2.25?
5. Kate has 223 pennies. John has 388 pennies. How many more pennies does John have?

Answers

1. 50 (2 quarters) + 50 (5 dimes) + 20 (4 nickels) = 120 cents = $\$1.20$
You have $\$1.20$.
2. $2:00$ p.m. + 1 hour = $3:00$ p.m. 30 more minutes equal $3:30$ p.m.
The puppet show ends at $3:30$ p.m.
3. Since January has 31 days, it takes 11 days to reach the end of the month. $14 - 11 = 3$ more days. 3 more days past January 31st would be February 3rd.
His sister's birthday is on February 3rd.
4. There are 4 quarters in a dollar. There are 8 quarters in 2 dollars.
Another 25 cents is 1 more quarter to make 9 quarters in all.
There are 9 quarters in $\$2.25$.
5. $388 - 223 = 165$
John has 165 more pennies.
