Mixed Multiplication and Division Word Problems #4

1. Robin has 9 packages of gum. There are 15 pieces in each package. How many pieces of gum does Robin have?

2. 63 people are going to the zoo. There are 3 cars to take people to the zoo. How many will go in each car if the same number go in each car?

3. I have 80 cents to buy candy. If each gumdrop costs 4 cents, how many gumdrops can I buy?

4. Maggi had 3 packages of cupcakes. There are 4 cupcakes in each package. She ate 5 cupcakes. How many are left?

5. 58 children are taking a bus to the zoo. They sit 2 children in every seat. How many seats will the children need in all?

Answers

1. 9 x 15 = 135
   Robin has 135 pieces.

2. 63 ÷ 3 = 21
   21 people will go in each car.

3. 80 ÷ 4 = 20
   I can buy 20 gumdrops.

4. 3 x 4 – 5 = 12 – 5 = 7
   7 are left.

5. 58 ÷ 2 = 29
   They need 29 seats.
